Benefits

- Efficiencies are generated by automating your scheduling and optimizing the Caregivers Routes

- Expenses are reduced by removing the tasks from the caregivers and saving mileage fees

- Caregivers are allowed to spend more time delivering care to your clients

- System will enable real time tracking of caregivers to allow assignment of emergency visits to the caregiver in the best position to handle the additional workload

- Reporting of actual individual caregiver mileage will be done by system and available in report format for reimbursement

- Improved performance opportunities from analysis reporting capabilities available to analyze performance

- CareRoutes solution can be a stand-alone solution or incorporated into existing the CMS, BPM, or Billing platforms

- Automates the Scheduling process to reduce time spent by Scheduling Administrator and or Caregivers

- Automates the Routing process to reduce time spent by Scheduling Administrator and or Caregivers

- Optimizes the Routing of Caregivers to the clients home to reduce time and mileage

- Built in flexibility to allow Caregivers to re-assign client visits to a float pool when not able to fulfill scheduled route

- Caregivers can be monitored in real time through their mobile devices which allows system to assign emergency visits to the most appropriate caregiver based on proximity to client and status of their current route time vs their schedule

- Maintains mileage records of each caregiver of the optimized routes and provides a mileage report for each caregiver for any determined time frame based on the visits documented by caregivers

- System has many configurable options to meet the specific needs of an organizations processes
